

We solved ragging problems for  
City of Flora

# ILLINOIS

15HP  
PUMP

SERVES AIRPORT  
& INDUSTRY

## PROBLEMS PRE-DERAGGER

- Pumps required lifting and cleaning at least a few times every month.
- Difficult location meant parking on the Highway, and craning over a ditch to gain access and lift the pump.
- Toby Rinehart, Superintendent of Public Services, attended WEFTEC 2017 and won a free DERAGGER™+ installation in a competition.

### BENEFITS:

*DERAGGER™+ eliminated ragging.*

*“Since winning a DERAGGER+ at WEFTEC 2017, we’ve not had to lift the lid of the station once in over a year!*

*We used to have to lift and clean at least a few times every month.”*

Toby Rinehart, Superintendent Of Public Services,  
City Of Flora

## SOLUTION

- The week after WEFTEC 2017, a DERAGGER™+ unit was installed and commissioned.
- It was set with *Real Time Pump Protection™* to prevent ragging and keep the pump running clean.

## BENEFITS

- Since installation in October 2017, the lid of the station has not been lifted once.
- Ragging eliminated by DERAGGER™+.
- Safety improved as Highway access is no longer required to lift / clean pumps regularly.

### BEFORE:

Few  
times  
each  
month

### AFTER:

Not  
lifted lid  
in over a  
year
